The RTR and STR series heated towel rails come complete with a moulded plug (please specify bottom left or right side). If you prefer to hard wire your heated towel you can ask your electrician to do this one of two ways - please see drawings below for details:

Hard wired directly to a standard switch with the cable visible (switch not included).
Hard wired to a separate switch with the wire concealed. Included free with every

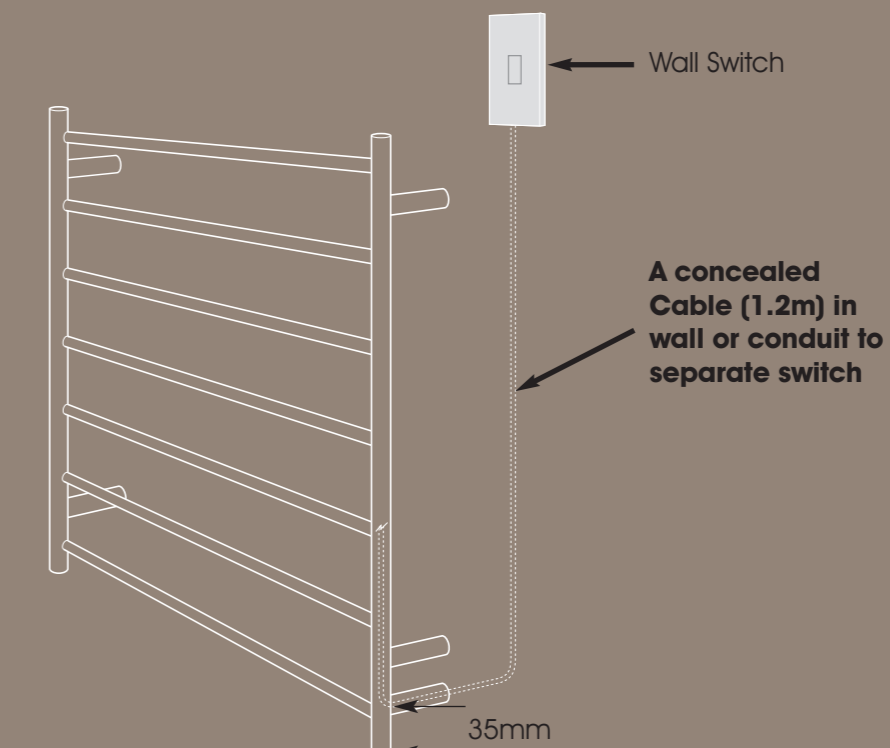

heated towel rail, you will find an extra bracket to conceal the wire as it goes into the wall (see drawing).

NOTE: Hard Wired installation must be carried out by a licenced electrician. The Radiant Heated Towel Rail range are manufactured in accordance with Australian Standards - SAA Certificate of Approval number V07911 and come with a five year replacement warranty.

Plug In

Hard Wired Concealed Cable

HARD WIRED OR PLUG IN
Radiant Towel Rails can be plugged in or hard wired to a switch with the cable hidden. A Concealed cable bracket is included with every towel rail as shown in the photo above.
